topranid@msu.edu | +1 (517) 202-6898 | East Lansing, MI 48825
LinkedIn: www.linkedin.com/in/dhruvtoprani | **Portfolio:** dhruvtoprani.vercel.app

EDUCATION

Michigan State University, College of Engineering (Honors College)

Expected: **May 2027**

Major: Bachelor of Science, Computer Engineering | **Minor:** Entrepreneurship & Innovation | **GPA:** 3.7/4.0

Awards: Dean's List (4/5), Presidential Scholarship (Top 1% @ MSU), Dr. Kun Mu Chen Memorial Scholar (**ECE Excellence**)

Relevant Coursework: Data Structures and Algorithms, Big Data Analysis, Network and Communication Security, Robotics

EXPERIENCE

MSU Research Foundation

Grand Rapids, MI

Technical Innovation Fellow

Sep 2025 – Present

- Led user discovery and usability testing with 15+ users; prioritized insights that reduced onboarding drop-off by 35%.
- Synthesized trends across 6 industries to identify whitespace opportunities, informing product strategy for 20+ startups.
- Owned end-to-end Salesforce CRM build, defining product requirements, architecting data models, and implementing analytics pipelines to enable real-time product and operational visibility.

Dewpoint

Lansing, MI

Technical Product Intern

Jun 2025 – Aug 2025

- Identified \$1.2M annual opportunity through market and customer analysis; authored PRD and defined product strategy.
- Established KPIs and built dashboards to track adoption, operator efficiency, and revenue impact, driving prioritization.
- Scoped and prioritized MVP for client-facing NOC portal by mapping high-frequency operator workflows; launched in 6 weeks with adoption across 20+ operators.

Consumers Energy

Jackson, MI

Software Engineering Intern

May 2025 – Jun 2025

- Estimated \$300K/month in unclaimed rebates, built AI-driven eligibility matcher projecting a 23% increase in capture.
- Built operations platform (C#/.NET, SQL), improving outage response efficiency by 35% while ensuring system reliability.
- Interviewed 10+ stakeholders to uncover workflow bottlenecks; led agile sprint to ship a tool that reduced delays by 40%.

D-CYPHER Lab (Focus: Human-AI Alignment)

East Lansing, MI

Research Intern

Feb 2024 – Present

- Designed AI-driven experiment validation systems, accelerating testing cycles by 4x compared to human pilots.
- Ran controlled A/B evaluations against state-of-the-art benchmarks to identify tradeoffs and guide algorithm selection.
- Simulated and analyzed 1,000+ task allocation scenarios to inform real-world team optimization models.

MSU VEX-U Robotics Team

Technical Program Lead

Aug 2023 – Aug 2025

- Planned and led sprints across software and hardware teams; qualified for VEX Worlds (top 5% globally).
- Delivered executive-style presentations to mentors and sponsors through decks; aligning progress, risks, and next steps.
- Established CI/CD workflows and maintained core autonomous codebase supporting competition-scale development.

PROJECTS

WattX | (HackDearborn 3 Winner)

- Built and shipped a full-stack P2P microgrid simulation modeling decentralized energy exchanges within 24 hours.
- Led product design, technical execution, and pitch for a 4-person team using Python, Flask, and Supabase.

Work Design for AI Agents | (Research Paper, AI in Business Conference @ Ohio State University)

- Developed a novel framework for structuring work in AI agents, integrating organizational behavior and AI systems.
- Built a parametric testing platform to generate large-scale datasets and compare performance across leading GenAI tools.

SKILLS AND INTERESTS

Product & Strategy: PRD writing, A/B Testing, User Interviews, Market Research, Agile/Scrum, Jira, Confluence

Data & Analytics: Python, SQL, Pandas, NumPy, Power BI, Tableau, Excel

Engineering & Systems: JavaScript, APIs, Flask, Firebase, C#/.NET, Git, Azure DevOps

Interests: Powerlifting, Community Service, Pickleball, Adventure Travel, Chess, Improvisational Theater
