EDUCATION

Michigan State University, College of Engineering (Honors College)

May 2027

Major: Bachelor of Science, Computer Engineering | Minor: Entrepreneurship & Innovation | GPA: 3.73/4.00

Awards: Presidential Scholar (Top 1% @ MSU), Engineering Undergraduate Award (Top 0.1% in College of Eng.)

Relevant Coursework: Robotics (Graduate Level), Data Structures and Algorithms, Big Data Analysis

EXPERIENCE

GAIA Predictive

Detroit, MI

Growth Intern

Jun 2026 – Present

- Led 30+ interviews across 5 verticals to prioritize market requirements and pilot strategy, contributing to 3+ signed LOIs.
- Owned 5+ paid pilots end to end, from lead sourcing, discovery through defining scope, onboarding, and milestone tracking.
- Drove exit from an underperforming vertical after customer analysis showed 2× longer sales cycles and lower expected ROI, reallocating capacity toward higher-value markets.

Whisker

Auburn Hills, MI

Technical Program Management Intern

May 2026 – Aug 2026

- Managed 40+ features in a program increment, performing risk and capacity analysis to drive milestone and resource decisions.
- Led cross functional Agile delivery for 12+ members over 6+ sprints, running PI Planning, ART sync, and daily standups using Jira.
- Automated product feature reprioritization impact assessments and replanning using a multi-agent AI system saving 6+ hrs/week.
- Cut NPI cycle time from 3+ hours to less than 5 minutes by automating manual processes for GTM and supply chain teams.
- Owned PI Readout reporting end-to-end, briefing 75+ technical and non-technical stakeholders on progress, risks, and tradeoffs.

MSU Research Foundation

Grand Rapids, MI

Product Management Intern

Sep 2025 – Present

- Reduced LMS onboarding drop-off by 35% through 50+ user interviews, funnel analysis, UAT, and shipped UX improvements.
- Built a unified CRM pipeline across 7+ apps, centralizing lifecycle metrics and improving full-funnel visibility across 5 teams.
- Developed a technical documentation-compression MCP adopted by 10+ startups, cutting AI token expenditure by up to 40%.
- Increased paid subscribers ~20% by analyzing customer data, identifying friction, and wireframing lower-friction pricing page.

Dewpoint

Lansing, MI

Product Management Intern

Jun 2025 – Aug 2025

- Validated a \$1.2M NOC opportunity through 50+ interviews, identifying operational workflows, barriers, and success metrics.
- Established NOC infrastructure and Power BI reporting across 6 KPIs, enabling leadership to track and prioritize improvements.
- Launched internal operations portal in SharePoint used by 20+ operators, centralizing resources and standardizing execution.

Consumers Energy

Jackson, MI

Software Engineering Intern

May 2025 – Jun 2025

- Surfaced \$300K/month in unclaimed customer benefits by prototyping a SQL/Python based rebate eligibility engine.
- Built C#/.NET and SQL operations platform for 500+ field users, replacing manual tracking and reducing errors by 35%.
- Created Python RAG pipeline across 5,000+ contract documents, cut internal knowledge lookup time by 70% for legal team.
- Automated compliance backlog across 1,500+ Power Apps, surfacing ownership, risk, and remediation priorities in Power BI.

INVOLVEMENT

- MSU VEX-U Robotics Team, Program Manager | Led sprints across 27 engineers to qualify for the World Finals (Top 5% globally).
- Spartan Technical Consulting, President | Serving 3+ client engagements across product design, AI implementation, and PCB design.
- Tower Guard Honor Society, President | Led 80-member service org to coordinate 6,000+ volunteer hours and raise \$20K for accessibility.
- Humanity First, Events Director | Raised \$40K to support disaster relief initiatives and medical mission trips serving 65+ countries.
- D-Cypher Lab, Researcher | Algorithms for resource-allocation in mixed teams, 1st place across Engineering, Computer Science and Math.

SELECTED PROJECTS

- GitStrata | Took a 0→1 product from concept to launch, turning GitHub history into personalized, shareable generative art.
- RatRadar NYC | Geospatial ML forecasting NYC 311 rat surges across 177 area codes, with XGBoost and SHAP.
- 6Dot | Prototyped braille phone attachment with Arduino Nano; user-tested with visually impaired students; 1st Place, MSU Designathon.
- HexaFlow | Designed and prototyped novel server-rack; secured pilot from the Director of MSU ICER; 1st Place, 2DAY Venture challenge.

SKILLS

Technical: Python, SQL, C++, C#/.NET, TypeScript, JavaScript, React, FastAPI, REST APIs

Data, AI & Automation: Excel, Power BI, BigQuery, pandas, Google Analytics, RAG, MCP, Agentic Workflows, Power Automate

Product & Customer: Customer Discovery, Product Requirements, UAT, Pilot Management, Go-to-Market Strategy, Market Research

Program & Delivery: Agile, Scrum, SAgE, PI Planning, Jira, Confluence, Azure DevOps, RAID, Capacity Planning

Operations & Strategy: Business Intelligence, Process Improvement, KPI Design, Workflow Design, Requirement Analysis
